PROFESSIONAL SUMMARY

Full Stack Software Engineer with over 5 years of experience building resilient, end-to-end applications. Focused on practical software design, from structuring databases and APIs to delivering high-performance user interfaces. Dedicated to clean data flow and system reliability to drive tangible business growth.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML/CSS, Python, C#, Java, SQL

Frameworks/Libraries: React, Angular 19, Redux, Three.js, Express, Django, MUI, Recharts, Zustand

Tools & Testing: Git, Docker, Jest, Cypress, Jasmine, Storybook, Webpack, Vite, CI/CD pipelines

Spoken Languages: English (C1), German (A2-B1), Russian (Native)

WORK EXPERIENCE

Software Engineer and Product Manager

Mar 2025 – Present

Sodatech

Germany

- Architected a scalable, modular platform infrastructure, enabling the business to transition from an API-only provider to a full-service platform.
- Streamlined system onboarding by authoring comprehensive technical documentation, effectively bridging the gap between backend architecture and client-facing integrations.
- Implemented secure, multi-tenant authentication workflows using Keycloakify, delivering unified identity management across distributed deployments.

Lead Frontend Engineer

Feb 2022 – Feb 2025

Inetra

Remote, Thailand, Russia

- Engineered the core system's data flow and architecture from the ground up to support a custom real estate CRM, replacing legacy workflows.
- Designed complex data models and maintained Python/Django API endpoints to ensure secure and efficient data exchange.
- Architected and implemented automated GitHub CI/CD pipelines to fully automate testing, build processes, and deployment workflows, ensuring error-free releases.
- Directed technical hiring and mentored 2 junior developers, enforcing strict code review standards to maintain architectural integrity and accelerate team onboarding.

Frontend Engineer

Sep 2021 – Feb 2022

DeskAlerts

Remote, USA

- Refactored 20% of a legacy C# and React codebase by enforcing DRY principles, significantly reducing technical debt and improving system maintainability.
- Optimized application architecture and implemented strategic code splitting, resulting in a 25% improvement in core system load speeds.
- Engineered core administrative systems, aligning functional implementations strictly with business and operational requirements.

Full Stack Engineer

Sep 2020 – Sep 2021

Limon

Perm, Russia

- Engineered high-performance analytical web applications for the banking sector, optimizing both backend data processing and frontend user experience.
- Refactored system architecture for scalability and implemented comprehensive testing protocols using Jest and JMeter, collectively reducing post-release bugs by 10% and significantly improving system stability.

TECHNICAL PROJECTS

Energy Data Platform | *React, Node.js, Express, Redux Toolkit, Recharts*

- Engineered an energy data platform featuring interactive dashboards for electricity generation data, eliminating manual reporting workflows.
- Designed a scalable Express backend serving 1.5M+ records with optimized filtering and data delivery.
- Implemented multi-select filters and dynamic chart rendering, applying code-splitting and memoization for fast UI performance.

Remote Control Mobile Application | *React, Python, Django, Redux*

- Developed a mobile application and React web interface for remotely controlling AI-enabled consumer electronics.
- Authored tool usage tutorials, improving onboarding efficiency and international team productivity.

EDUCATION & CERTIFICATIONS

National Research University Higher School of Economics

Bachelor of Software Engineering

Sep 2018 – Jun 2022

Perm, Russia

Certifications: Advanced Frontend Course (~100h), IELTS Language Certificate (7.0 - C1), Social Media Data Analytics (Coursera), Mobile Development Course (Stepik)
